

The Opportunity:

MediaXstream, a carrier-neutral, high quality transport and managed network services for the production and broadcast industries required a fast, dedicated dark fiber solutions provider to connect their core network, located at 60 Hudson Street in New York to various sports and entertainment venues. It was important for MediaXstream to find a fiber solution provider that was flexible, reliable and easy to work with. With roots in metro fiber connectivity, MediaXstream knew the hurdles associated with deploying a top-notch dark fiber solution to state-of-the-art entertainment arenas requiring low-latency transmission services.

The Solution:

Since Atlantic Metro Communications owns and operates various Internet data centers and networks throughout the New York Metropolitan area and is adept at providing metro area transport services, the company knew the hurdles that they needed to overcome in order to implement a metro area network quickly and efficiently.

The Results:

Together, Atlantic Metro Communications and MediaXstream provide an efficient delivery platform that enables production companies to quickly transmit, edit and ultimately broadcast high-definition Internet and Television entertainment to the mass-market.
