

Atlantic Metro Communications' Metro Ethernet service provides layer2 & layer3 network connectivity over our next generation, nationwide, pure Ethernet backbone. This high-speed connectivity solution connects directly to your office providing one of the most reliable, affordable, metro network connections currently available in the market place. Our highly skilled engineers maintain the highest quality of service to our customers 24 hours a day. Services can be delivered in as little as 25 business days or less.

Key Features

- Fully Synchronous Speeds ranging from 5 Mbps-45 Mbps
- Unique alternative to competing bonded T1's and DS3's at a fraction of the price
- Fully Managed Router Available
- Fully Managed Firewall with DHCP Available
- Pro-active Monitoring included in all services
